

Let's make 2021 a safe year for everyone...

...and demand the freedom of Julian Assange today !

Julian Assange: Award-winning journalist and publisher, founder of Wikileaks, helped expose corruption and war crimes committed by our governments.

Tortured and spied on for years, then illegally dragged out of the Ecuadorian Embassy and sent to Belmarsh Prison, the "Guantanamo of the UK". Despite his declining health, Assange is still forcefully detained in a jail rampant with COVID-19.

His trial- condemned by the UN and which even Amnesty International was not allowed to witness- is a travesty of justice. Soon, Assange may be extradited to the U.S. where he could face the death penalty. That is, if he is not assassinated or dies of COVID or suicide first.

To be clear : Julian Assange is a human rights defender, who is being punished for exposing crimes, not committing them !

By supporting him you support freedom of the press and your right to uncensored information. By defending him, you help make the world a safer place.
